BECAUSE COFFEE CAN HAVE A POSITIVE IMPACT

Sustainability is at the heart of **Nespresso** and has been a fundamental pillar of the business.

Over 150,000 farmers are committed to high-quality productions and implementing sustainable practices. 93% of Nespresso coffee is sourced through AAA Program – The Nespresso AAA Sustainable Quality™ Program, co-designed with the Rainforest Alliance in 2003.

The AAA Program is a coffee sourcing program designed to ensure the continued supply of high-quality coffee while improving the livelihoods of farmers and their communities and protecting the environment.

Nespresso is also certified B Corp™, a global movement of companies and consumers using business as a force for good. For Nespresso, B Corp™ certification reflects 30 years of commitment to sustainability. Nespresso is proud to represent and offer a coffee that prioritizes people and the planet.
